Microsoft Surface Pro Recommended Screen Display Settings

Warning Note: Before changing any setting, write down the current setting first, in-case you decide to change it back.

#1 All Surfaces: disable screen side camera using Device Manager.

#2 Surface Pro 3:
A: Right click on the Windows Desktop and select “Screen Resolution”
   1) Set the screen resolution to: \textbf{1280 x 800}
   2) Set the screen orientation to \textbf{Landscape}
   3) Un-Check the “Allow the screen to auto-rotate”.
B: Right click on the Windows Desktop and select “Personalization”
   1) Make sure the “Change the size of all items” is slid to the far left “Smaller” this typically represents 100% not 125% or 150%.

#3 Surface Pro 2:
A: Right click on the Windows Desktop and select “Screen Resolution”
   1) Set the screen resolution to: \textbf{1360 x 768}
   2) Set the screen orientation to \textbf{Landscape}
   3) Un-Check the “Allow the screen to auto-rotate”.
B: Right click on the Windows Desktop and select “Personalization”
   1) Make sure the “Change the size of all items” is slid to the far left “Smaller” this typically represents 100% not 125% or 150%.
   2) Under the “Change only the text size”, select “Title bars” and set them to \textbf{14, 13, or 12}. We recommend \textbf{14}.

Set to the "Smallest" Level, typically 100%.
Some systems have a slider bar, if so slide it to the far left.
If you have to change this setting they will need to restart their computer.
