CLIA Numbers

1) CLIA numbers can be set up from the **Utility Menu**, at the option "**CHG/HCFA**"

   On this screen, you enter the CHG codes (typically lab procedures) that need CLIA numbers on the left, and the CLIA number associated in the field labeled "**HCFA Field 23 CLIA #**"

2) In addition, make sure **do not** have **prior authorization numbers** on patient's
   Insurance Detail screens, these go in the same field and will conflict with the CLIA numbers.
