

# Importing Meds From RxHub

To receive a match with SureScripts benefit and history (RxHub) there has to be a 100% exact match on the patients' first name, last name, DOB, gender, state and zip code. Providers will receive a match on about 60-70% of their patient data base. As long as there is a 100% exact match and the insurance company participates with SureScripts, providers will receive the link under the patients' name.

Providers must always be passing over their NPI# in the xml as well.

A match is made with RxHub, click on the RxHistory/RxHub link

The screenshot shows the 'Compose Rx' web application interface. At the top, the patient is identified as Bruce Paltrow, DOB: 2/1/1945, Gender: Male. The interface includes tabs for 'Select Patient', 'Compose Rx', 'Med Entry', 'Pt. Details', 'Pt. Notes', 'Diagnoses', and 'Admin'. The 'Compose Rx' tab is active, displaying a table of pending prescriptions. A link 'Rx History/RxHub' is visible below the patient information, which is highlighted by an arrow. The table lists medications such as Lamictal 100 mg Tab and Oxycodone-Acetaminophen 5 mg-325 mg Tab. The bottom of the screen shows the Windows taskbar with various open applications.

# Importing Meds From RxHub

A pop up window opens up, click request Prescription History

The screenshot shows the 'Compose Rx' interface in a Windows Internet Explorer browser. The main window displays patient information for Bruce Paltrow, DOB: 2/1/1945, Gender: Male, and the designated Dr/Prescriber: A. Schweitzer. The interface includes tabs for Select Patient, Compose Rx, Med Entry, Pt. Details, Pt. Notes, Diagnoses, and Admin. A pop-up window titled 'Patient Drug History - Windows Internet Explorer' is open, showing a warning about clinical judgement and a 'Request Prescription History' button. An arrow points from the 'Request Prescription History' button in the pop-up to the 'Request Prescription History' button in the main window. The main window also shows a table of prescription history with columns for date, medication name, dose, and prescriber.

RxHub provides access to your patient's prescription history as supplied by health plans with participating pharmacy benefit managers ("PBMs", such as Medco or ESI). Rx by all doctors are included, although the prescriber's name may be incorrect.

Caution:  
Use clinical judgement: the patient may have been misidentified.  
Do not assume the supplied prescription history is complete. It will not show prescriptions the patient paid cash for or those recently prescribed. In addition, state law sometimes prohibits the display of psychiatric and other "sensitive" medications.

By requesting this patient's prescription history, you confirm that you are directly involved in the care of this patient and that you have received this patient's consent to view this information.

Request history for the prior 4 Months Request Prescription History

## Importing Meds From RxHub

You will then see a list of any medications that the patient has had filled and has filed on their insurance plan. You will see the medication, doctors name and pharmacy name. The provider can then check the boxes on the left the click import to patient record. This will put the medications in the patients Current Med list in a brown tint with the name of the doctor that wrote the medication, the date it was filled and the source being from RxHub.

The screenshot shows a web application interface with two overlapping windows. The background window is titled 'Compose Rx' and shows patient information for 'GEMSSCAM CARDIOVASCULAR GROUP'. The foreground window is titled 'Patient Drug History' and displays a table of medication history.

**Medication history rows: 50**

**Import to Pt Record 4 Month Rx History**

# Importing Meds From RxHub

When a match is made with RxHub, insurance is automatically populated as well.

The screenshot displays the 'Compose Rx' web application interface. At the top, the patient is identified as **Bruce Paltrow** (DOB: 2/1/1945, Gender: Male). The designated prescriber is **A. Schweitzer**. A dropdown menu on the right is set to **HONEYWELL RXHUBPM**, with an arrow pointing to it from the right side of the screen.

The main section shows a table of **Pending Rx** with the following data:

Rx Date Stage	Drug	Sig	#	Refill	Doc / Loc Source	Actions
08/03/09 InProc	<a href="#">Lamictal 100 mg Tab</a> On Formulary On Formulary	1 DAILY	30	0	Putin West Clini	[EDIT] [X]

Below the pending list, there are search fields for **Drug Search** and **Allergy / Intolerance Search**. The allergy section states: "No Allergies have been entered."

The **Current Medications for Bruce Paltrow** section shows a list of active medications:

Rx Date Stage	Drug	Sig	#	Refill	Doc / Loc Source	Actions
07/09/09	experimental med 1 po bid no refills PRN DAW take with food				Schweitzer West Clini	[EDIT]
03/14/09	<a href="#">Oxycodone-Acetaminophen 5 mg-325 mg Tab</a>	1 TID *	90	0	"SMITH, JOHN" RxHub	[EDIT]
03/16/09	<a href="#">Oxycodone-Acetaminophen 5 mg-325 mg Tab</a>			60.0	"SMITH, JOHN" RxHub	[EDIT]
	<a href="#">Oxycodone-Acetaminophen 5 mg-325 mg Tab</a>			60.0	"SMITH, JOHN" RxHub	[EDIT]

The Windows taskbar at the bottom shows the system clock as 12:54 PM.
