## Electronic Claims Sending up to 12 Diagnosis Codes

PowerSoftMD sends electronic claims in the HCFA 1500 CMS print image format. With this claim image format you can send up to 12 unique diagnosis per claims. There are up to 4 diagnosis codes per charge, with a maximum number of 12 unique diagnosis codes per claim.

Some insurance carriers may allow you to send a dummy CHG Code just to attach additional Diagnosis codes to it. For example they might let you use the code CHG Code 99080 with zero charges on it.

You would need to check with your insurance carrier to see if this is acceptable to them. Here is a link to an example:

<https://www.bcbsal.org/providers/publications/providerFacts/2014-005.pdf>

You would also need to add the 99080 or whatever CHG Code you use to your CHG Code Fee Schedule from the Utility Menu.
