PowerSoftMD CD Update Instructions

❑ If you are prompted to Overwrite Files. Reply "A" for all each time you are prompted.

Update Checklist

__1 Back up PowerSoftMD system ----- THIS *IS **EXTREMELY** IMPORTANT.*

__2 Exit **all** running programs, even if you have to **Restart** your computer.

__3 Insert the Update CD (**label up**) into your computer.

__4 With-in approximately 1 minute you should be prompted with a **Menu**.
       If not then do the following:
          - Open you're My Computer icon or Computer from the Start Menu.
          - Locate the PowerSoftMD update CD; double-click on it, to open it.
          - Next, double-click on the **Runnow** file.

__5 Select the **BLUE** "**Update Main Computer/Server**" button, even if you aren't
       sitting at your main computer. Read and follow the on screen instructions.
       (If you see an **"Abort, Retry, Fail"** message, then restart your computer, don't
       start PowerSoftMD, and use the CD again, please. Another option is to reply "F".)

__6 Remove the Update CD when the update is complete.

__7 At each work station, Login to PowerSoftMD again. You will be prompted to
       Update your work station, answer YES or OK to all on screen instructions and
       your work station should be updated from the server. If for any reason this fails try
       using the Tools Option from the top of the Primary Menu and then Work Station
       Update.

Typically, you only need to use the CD once.
