DataTec
PowerSoftMD

_____

All the *PowerSoftMD* data and programs are stored in sub-folders of **\EZW, \EZWARCH**, and **any folder** starting with **\EZW** You must set your Anti-Virus to **exclude** these folders on **all computers** for both scanning and real time protection. On both the local C: Drive and your Shared Main Drive for *PowerSoftMD*.

WebRoot Anti-Virus does **NOT** allow these types of exclusions. This can cause multiple problems including:
1) *PowerSoftMD* programs being deleted or quarantined
2) Extremely slow system performance.

Therefore, **WebRoot** should **never** be used with *PowerSoftMD*.
